

Ecology of Community: Māori understandings and values in relation to spatial data

SRA - Project 3

Dr Lynette Carter (Kai Tahu, University of Otago)

Dr David Goodwin (University of Otago)

James Berghan (Te Rarawa, Te Aupouri, PhD candidate)

Project

‘Ecology of community: Māori understandings and values in relation to spatial data’

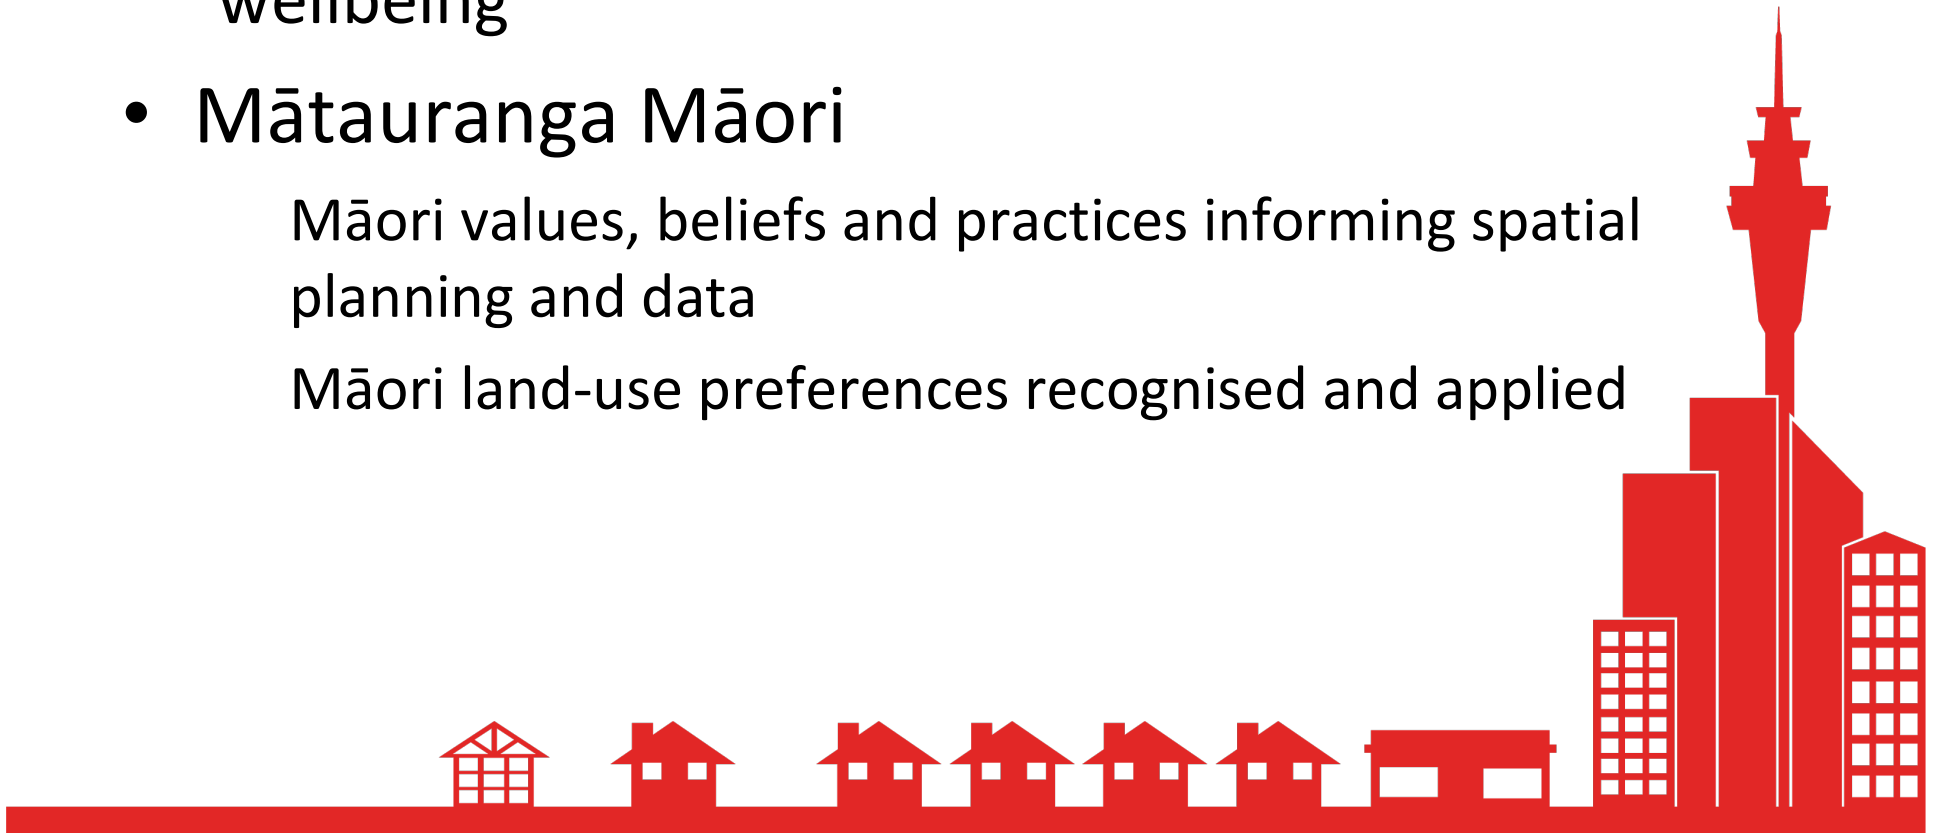

•Research aims

- Develop a model and framework to guide successful incorporation of Mātauranga Māori within urban and semi-urban developments;
- Develop and draft cadastral legislation to enable Māori land-right preferences to be accommodated within the current cadastral system

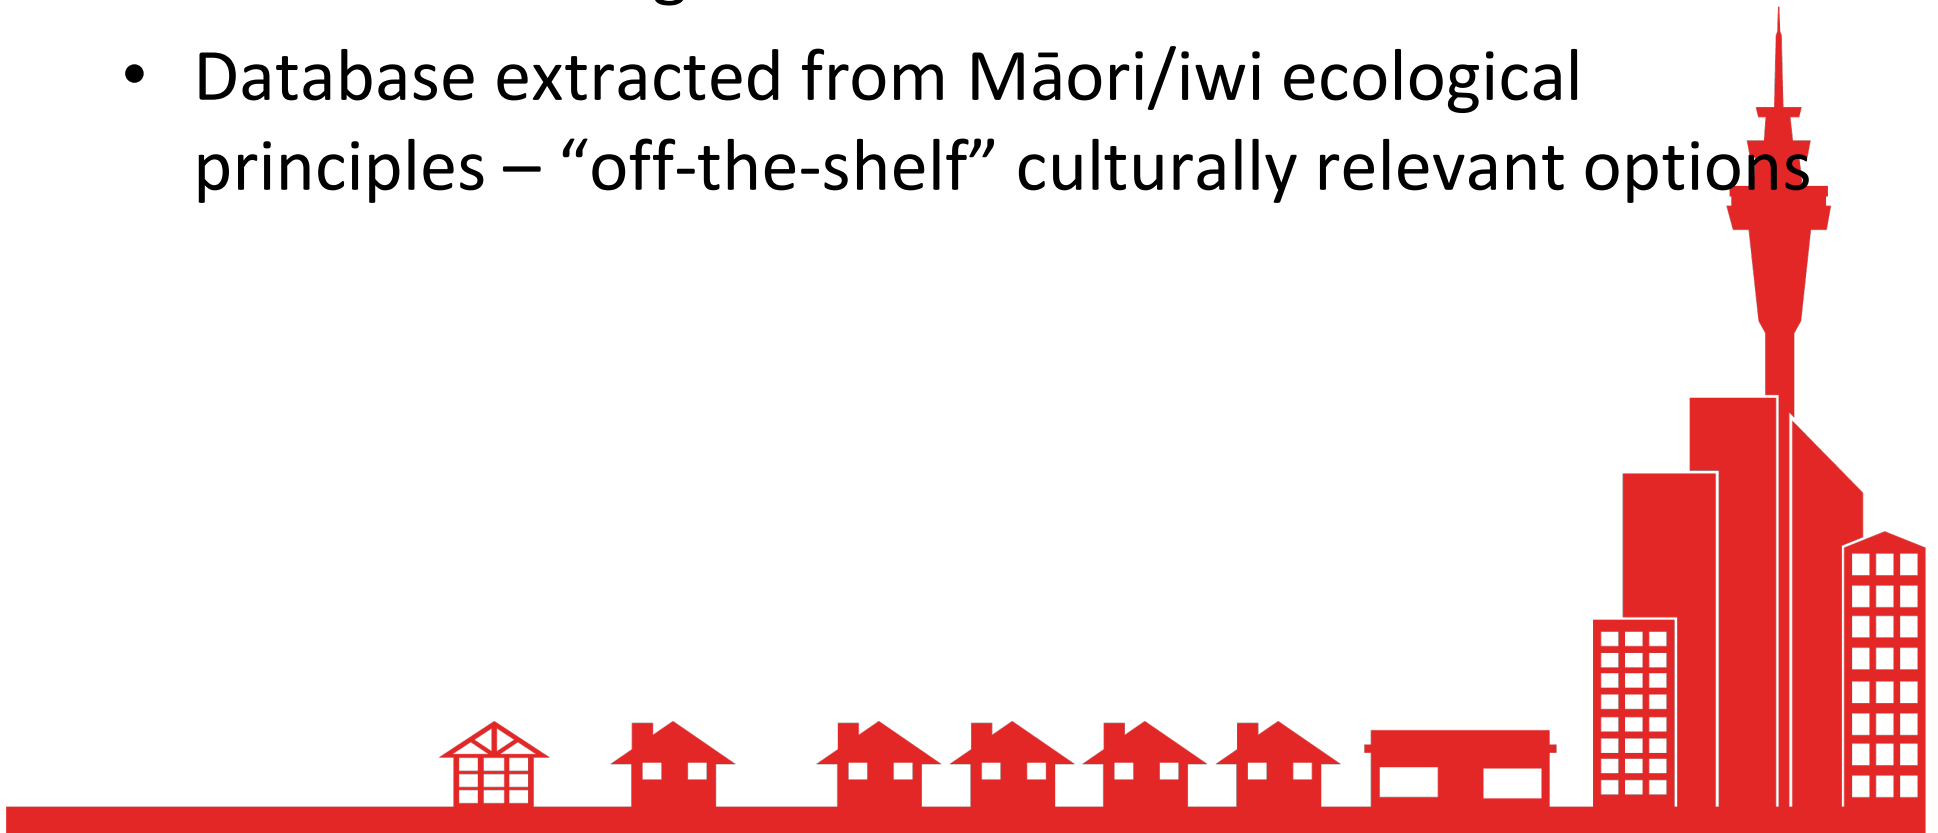

Vision Mātauranga objectives

- Hauora/Oranga:
Better communities for Improved Health and wellbeing
- Mātauranga Māori
Māori values, beliefs and practices informing spatial planning and data
Māori land-use preferences recognised and applied

Research significance

- develop an inventory of Mātauranga Māori/iwi knowledge frameworks – leading and guiding decision-making
- Database extracted from Māori/iwi ecological principles – “off-the-shelf” culturally relevant options

Case Studies
